Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1—5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asahina et al., (6,450,880) in view of Moon et al., (6,729,153). Asahina et al., disclose an indoor unit of an air conditioner comprising a main body 10 (see Fig. 3); an opaque front panel 20 (The panel 20 is made of plastic material and therefore it is opaque) integrally molded with a mounting portion 30 that is configured to be attached to a front portion main body 10. See Fig.3-4, column 6, line 20 to column 7, line 20. Asahina et al., disclose the invention substantially as claimed as stated above except a transparent panel. Moon et al., teach the use of a transparent panel 60 attached to the front panel of an indoor air conditioning unit for the purpose of inserting picture through a picture or photo insertion slot 61 behind the transparent panel 60. See Fig 4, column 3, line 39 to column 4, line 64. Therefore, it would have been obvious to one having ordinary skill in

Art Unit: 3744

the art at the time the invention was made to modify air conditioning unit of Asahina et al., such that a transparent panel could be provided in order to display any picture of photo. (The color scheme is an obvious to photo or picture scheme to be displayed). Regarding peripheral portion of claim 2, the Examiner considers that panel 60 is on the substantial peripheral to the inner front panel.
